

# CONOVUM UI5 Companion

Manage your business trips using modern HTML5 technology

## Solution Sheet UI5 Companion

### Why use the UI5 Companion?

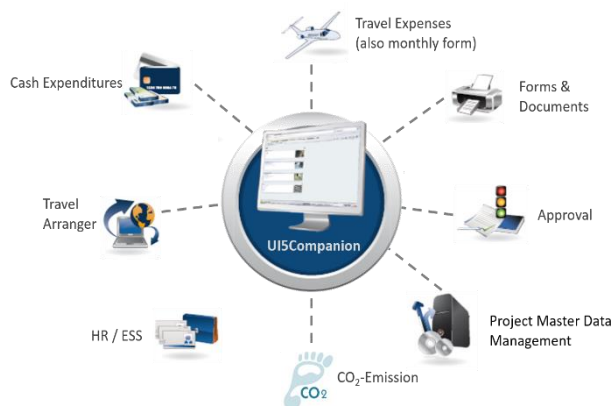

The UI5 Companion supports you with all processes related to business trips. The applications allow for the creation and approval of business travel requests, travel expense reports and cash expenses.

### Key Features

- ✓ business travel requests
- ✓ travel expense reports
- ✓ monthly expense reports
- ✓ cash expenses
- ✓ analysis of CO<sub>2</sub>-emissions
- ✓ credit card receipts
- ✓ travel arranger function
- ✓ completely based on SAP standard UI technology SAPUI5 / Fiori UX
- ✓ complete adoption of SAP customizing
- ✓ smartphone-optimised  
ReceiptSnap app allows you to take photos of receipts and upload them into the UI5 Companion

Beside a general improvement of the travel management process, several useful additional modules allow for the purposeful enhancement of single functions. Its great usability fosters self-service among employees while simultaneously decreasing the risk for errors in your travel management. Finally, your company gets valuable new insights through innovative and appealing reports and analytics.

### UI5 Companion Scenarios

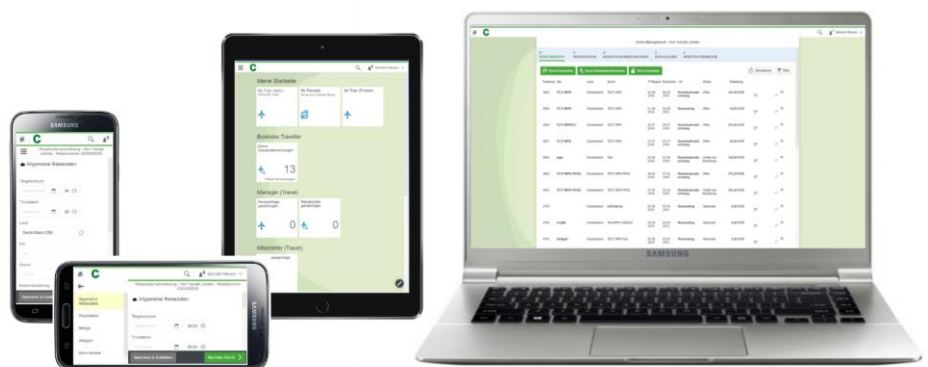

The conovum UI5 Companion enables the homogeneous acquisition and editing of all relevant elements regarding the travel process within one

application. The UI5 Companion and its related apps are role-based and can be personalised individually for its users.

### Responsive Design for Laptop or Mobile Devices

Based on SAPUI5 / Fiori UX technology the user friendly HTML5 interface allows you to manage the whole travel process using both laptops and mobile devices.

The interface automatically adapts to the display properties of the respective device to guarantee an optimal presentation and handling of the content.

## Solution Sheet UI5 Companion

### Technical Requirements

SAP systems rely on the following free ABAP components:

- ✓ UI components / User Interface Technology
- ✓ SAP NetWeaver Gateway

### SAPUI5 / Fiori UX supports the following browsers and platforms:

- ✓ iOS
- ✓ Android
- ✓ Windows Phone
- ✓ Windows with the following browsers:
  - ✓ SAP Fiori Client
  - ✓ Internet Explorer
  - ✓ Microsoft Edge
  - ✓ Mozilla Firefox
  - ✓ Google Chrome

### Intuitive Travel Expense Reporting

The clearly structured application offers a high level of usability. The traveller or travel arranger can handle the application intuitively without previous knowledge.

If desired the application can be modified to implement your corporate design.

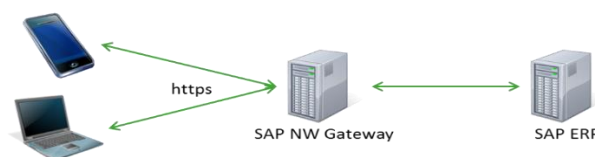

The optional ReceiptSnap app allows travellers to capture and manage their receipts during their business trip. In combination with the adaptable HTML5

interface it is possible to create and submit your travel expenses from the road. For approvers, the separated smartphone-optimised Approval App allows them to easily handle all requests (trips, expenses and vacation), leave comments and get additional details of the requesting person.

### UI5 Companion System Architecture

Various options are possible regarding the system architecture, analog to SAP Fiori Apps. Identical to other standard SAP Fiori Apps, the UI5 Companion can be integrated into the Fiori Launchpad. However, an integration into other portals is possible as well.

*Example: SAP ERP and SAP NetWeaver Gateway (Recommendation):*
